SENIOR DATA ENGINEER (AI INTEGRATION & DATA PLATFORM ARCHITECTURE)

Profile

With 18 years of experience in **data engineering, machine learning, and business intelligence**, I possess a diverse skill set spanning modern data platforms, ETL/ELT tools, and BI solutions. I'm currently pioneering an Agentic AI framework to integrate large language models with legacy systems. I bring cross-functional experience spanning Hospitality, Finance, Insurance, and Law Enforcement. Combined with expertise in regulatory compliance (GDPR, PCI-DSS, CJIS, SOX).

Data Engineering & Automation

I'm proficient in **dbt Core, Airflow**, and **CI/CD automation** using GitHub Actions. I have hands-on, end-to-end experience deploying Python packages to **PyPI.org**, and I thrive in Python-based data engineering projects using tools like **pytest, pylint, poetry, uv, SQLAlchemy**, and **pandas**.

Technical & Solution Architecture

Designing Scalable, End-to-End Data Platforms Across Cloud and On-Prem Environments.

Bridging Ingestion, ETL/ELT, Orchestration, and Insight with Modern Data Stacks and delivering Robust, Modular Architectures with **BigQuery, Snowflake, dbt-core, Apache Airflow, Looker, Power BI, Tableau**

Machine Learning

I'm experienced in building, training, and managing ML models using **BigQuery ML** and **Postgres ML**, enabling predictive analytics within cloud-native pipelines.

Business Intelligence

I'm adept at delivering actionable insights through **Looker Studio, Tableau**, and **Power BI**, transforming raw data into accessible visual stories.

ETL & Data Modeling

My background includes working with ETL tools like **Informatica Power Center, Informatica Cloud (IDMC)**, and **Talend Data Studio**, and I have deep experience in designing data models for both **OLTP** and **OLAP** systems.

AI Integration

Currently engaged in an **Agentic AI framework project** that leverages **MCP protocol** to enable seamless communication between **Large Language Models (LLMs)** and legacy on-prem systems such as **Postgres DB, File Servers**. This initiative bridges cutting-edge AI with real-world enterprise infrastructure.

Industry Expertise & Compliance

My career spans sectors like **Hospitality, Finance, Insurance**, and **Law Enforcement**, giving me a well-rounded perspective on domain-specific challenges. I bring strong fluency in regulatory compliance—including **GDPR, PCI-DSS, CJIS**, and **SOX**—which allows me to design and implement secure, compliant solutions in highly regulated environments.

Employment History

System Analyst, Dept. of Safety NH (Contractor), Concord, NH

APRIL 2020

Business System Analyst, Caesars Entertainment (Contractor), Las Vegas, NV

JULY 2018 – MARCH 2020

Business Analyst, Aflac (Contractor), Atlanta, GA

FEBRUARY 2017 – JUNE 2018

Data Engineer, Thrivent Financial (Contractor), Appleton, WI

SEPTEMBER 2009 – JANUARY 2016

Sep 2009 – July 2013

System Engineer, ING (Contractor), Noida, India

DECEMBER 2007 – AUGUST 2009

Education

Bachelor of Technology (I.T), MIET College, Meerut affiliated with U.P Technical University, Meerut, (UP) India

AUGUST 2003 – JULY 2007

Completed 4-year B. Tech (Information Technology) degree course from
